

## **FX Solutions Introduces FX AccuCharts®**

### **Saddle River, New Jersey, July 24, 2006**

FX Solutions ([www.fxsol.com](http://www.fxsol.com)), a leading foreign exchange brokerage executing more than 99 percent of its customers' trades with no human intervention, today introduced a new charting software package, FX AccuCharts®.

Free and available exclusively to FX Solutions customers, FX AccuCharts represents the next generation in forex charting software. Among its many unique and powerful features, FX AccuCharts offers:

- Over 150 of the most sophisticated technical indicators and oscillators.
- The ability to create and save highly customizable charting workspaces, with flexible layouts and virtually unlimited look and feel options.
- Instantaneous updates direct from the Interbank forex market via FX Solutions' exclusive zero-latency price feed.
- Unlimited customization and revision of popular indicators.
- Build-your-own indicators.
- Powerful drawing tools.
- Fully customizable and audible indicator alerts.

Unlike most forex brokers, which offer only a limited number of free charting tools to their customers, FX Solutions believes that offering as many charts as possible will help traders improve returns.

"FX Solutions is not a typical forex broker, because our success is based on our customers' success, not their failure," said Robert Cortright, managing partner of FX Solutions. "From fixed spreads to our proprietary interbank price feed, FX Solutions continually invests in new tools and capabilities to give traders every opportunity to capture strong returns."

With over 150 different charting options, FX AccuCharts is the most comprehensive suite of broker-based charting tools available today. In addition, FX AccuCharts are perfectly synchronized to FX Solutions' proprietary forex market data feed, overcoming a traditional obstacle of third-party applications.

"Traders are always frustrated when the prices they see in their off-the-shelf charting applications don't line up with what their brokers are quoting," added Cortright. "FX AccuCharts solves that problem because the data that drives it is the same data that we quote. So if a trader sees a price on one of our charts, it will be reflected simultaneously on their trading screen."

Another unique feature of FX AccuCharts is the ability for traders to customize any of the 150 indicators based on their own unique strengths, preferred strategies and current market opinions.

FX Solutions is offering a series of live web tutorials to provide an overview and working knowledge of the FX AccuCharts. To register for an FX AccuCharts web tutorial, click here:
