

## **FX Solutions Named Most Popular Online Forex Trading Platform by Hexun**

**Saddle River, New Jersey, January 30, 2009** – FX Solutions ([www.fx solutions.com](http://www.fx solutions.com)) was named “Most Popular [Forex Platform](#)” by *Hexun*, one of China’s largest financial information portals.

*Hexun* evaluated what it considered the world’s prominent Forex platforms on several criteria including: Platform stability, trade execution, usability, functionally and scalability. The results were based on polls of independent users as well as a panel of industry experts. FX Solutions scored highly in all categories and was ranked as the most popular platform for online Forex trading.

“It’s a great honor for us at FX Solutions to have our trading platform recognized abroad for its speed, functionality and reliability” said FX Solutions CEO, Tom Plaut. “When building the GTS Pro platform, we took into account the needs of our customers all over the world. This distinction from our friends at Hexun in China is a reflection of the global appeal of online Forex trading.”

The honor from Hexun is the second such distinction FX Solutions has received already in 2009. The company’s GTS Platform was ranked the #1 Forex trading platform in the February 2009 edition of *e-Forex Magazine*.

### **About FX Solutions**

FX Solutions is a leading U.S.-based online foreign exchange broker serving both retail and institutional customers. The Company provides IBs and White Label Partners FX trading and risk management in over 50 countries through its Global Trading System (GTS) platform. Regulated by the CFTC and NFA, FX Solutions’ custom-engineered suite of applications includes one-click trading, automated execution of orders, a proprietary price feed and competitive fixed-spread pricing - resulting in consistently low executable spreads. FX Solutions has websites and complete customer support in four languages.

FX Solutions’ Global Trading System platform, known as GTS, was built to be scalable and flexible, serving the needs of retail clients and institutional partners. The GTS platform provides for over 99% automated execution of all orders\* as well as a suite of professional trading features and tools. Recently, FX Solutions announced the launch of two new products: GTS Web, a web-based platform and FX AccuCharts, a charting package that has over 150 indicators and allows for trading from the charts.
